5/16/07 CERES Data Management Team Meeting Agenda

Upcoming Events:

Nov 11 – 14, 2007: Fall CERES Science Team Meeting in Victoria, BC, Canada

Other Topics to Cover:

Farewell to Mike Little: After guiding the CERES Data Management Team for over 5 years, Mike is stepping down. It will take two of us to replace Mike. Erika Geier will be leading the team with the help of John Robbins. Erika will take a great interest in the system engineering and operations aspect. John will support the CERES cost modeling and CMMI efforts, ensure that we have current statistics on CERES DM production and validation software, and provide a team interface for ITS issues.

System Engineering Committee (SEC): Those wishing to serve on the SEC committee are asked to send e-mail to Erika and John by next Wednesday (5/23/07). Looking to establish a core committee of 6 members: 3 from ASDC and 3 from Enterprise Parkway.

Action Items and Concerns: John and Erika are attempting to compile lists of action items and concerns. Enterprise Parkway folks should expect brief, individual visits the week of May 21 to chat about general status, action items, concerns/questions, and suggestions. Any ASDC folks wishing a visit should let John or Erika know. All are encouraged to send/call in action items, concerns, and suggestions as they come up.
