

07/23/2008 CERES Data Management Team Meeting

Upcoming Events:

August 06 (?) – NPP SDS SD3E, Land PEATE, Earth Radiation PEATE ‘Delta Design Review’
(Schweiss is waiting on LaRC to confirm date)

Notes from the previous meeting (07/09/2008)

ANNOUNCEMENTS

Erika Geier, Lee Bodden, Jim Closs, and Lisa Coleman are attending a Technical Interchange Meeting (TIM) at Goddard.

The results of the September 21, 2006, CMMI Class A appraisal are finally posted on the SEI Web site.

ASDC

Finished processing Aqua TISA Averaging SS7; still processing Aqua Synoptic SARB.

The StorNext upgrade to release 3.1.2 was done on 7/8/08; everything seems to be working; Quantum promises NASA this will fix lots of problems.

Compilers have been installed on the X86 test platform.

Upcoming outages – network outage weekend after next (7/19-20); ASDC outage starting 7/18, systems should be back online 7/19.

Disk space is at 93%.

SCF

Toolkit – HDF problems resolved for some people.

Recompiled Toolkit to make another code change that only affects Macs so Dale can run with 5.2.15.

Power outage in Bldg. 1250 from 5:30 p.m. 7/18 through 5:30 p.m. 7/20; machines coming down about 4:00 Friday (7/18), back up by 8-9:00 a.m. Monday (7/21).

Ada compiler installed on Macs, not working yet, Scott is working with Denise to resolve the issues.

Web server move postponed until at least early August. Move will also include a non-CERES SAN. Everything will be back up and working about a week after the move.

The transition period for moving (all) servers from B1250 to ASDC will be about from early August 2008 through the end of 2008.

Regarding the transition of desktops to ODIN – starting now through August/September.

At least for the time being, continue to use the current (SCF) help ticket system.

FrameMaker will be off of the Citrix servers and *asdsun* by October 31; trying to remove it sooner; this will cause problems for ERBE.

SEC

No Report.

CM

No SCCRs to be reviewed.

Expecting GGEO (SCCR 675) delivery this week.

SUBSYSTEM STATUS:

Instrument

Working with Scott on Ada compiler on Macs.

Problems running Instrument delivery in SGE at the ASDC.

ERBE-like

Working in Toolkit 5.2.15.

Clouds

Working on Edition2 code conversion.

Convolution

Working on NEWS convolution algorithms.

Inversion

Working on code conversion.

SARB

Working on code conversion.

TISA Averaging

Working on SRBAVG.

GGEO

Extend delivery to cover 2007.

FSW processing can continue at the ASDC because overlap data isn't needed.
