

CERES SCF Working Group STATUS Table for Sep. 25, 1996

DESCRIPTION	Status	Problems
Optical jukebox	IT IS AVAILABLE, spread the word. We have 114GB at our disposal. Drives are on order to double the capacity of this device.	
DMSS	ceres is currently using 856GB on masstor. Ceres is ranked number 1, in the latest top 1000 users report.	
Thunder status	The new and improved R10000s are due in the next 6 - 8 weeks. We are currently running on 7 processors.	Silicon not layered properly from the foundary causes the processor to fail after several weeks of continued use.
Sun and SGI HW upgrades	Waiting on upgraded equipment. Everything is due in the next 1 -2 weeks.	
High speed Connection to the DAAC	Was placed on hold until end of year hardware purchases were complete.	Need sustained peak data transfer rates.
Network in Bldg. 1250	It seems all the FDDI cable was pulled. Waiting for completion notification from David Yeager.	
SAIC Network WAN/LAN	Etherswicthing upgrade procurement underway.	
Sun Solaris upgrade	Onsite and Offsite SUNOS migration effort almost complete. The next step is to apply all patches to all computers to make them identical.
