

## CERES SCF STATUS Table for June 21, 2000

<i>DESCRIPTION</i>	<i>Status</i>	<i>Problems</i>
<b>Thunder &amp; Lightning</b>	An additional 2GB of memory was added to both thunder and lightning. A new direct connect to samantha from T&L was configured and tested.	
<b>AMLJ/ceresarchive</b>	Work continues on the get and put scripts to the archive.	
<b>Security</b>	Wu-ftp was re-compiled on all of the SUNs to correct problems with the gui tool that allows for recursive ftp copies.	
<b>Remedy Problem Tracking System</b>	The new system is due out very soon. The SAs are resolving a few issues.	
<b>Tape Library</b>	Half of the old Tape Library (future Mission Ops Center) now has a raised ceiling and the raised floor is under construction. Step two involves moving all equipment to the completed half of the room, so work can begin on the unfinished half. This work will not begin until the HVAC unit comes in (it is due in mid July).	
<b>On site network problems</b>	New CISCO switches came in yesterday. A new 1250 router is now on order to replace the failing router currently installed. The Network Support group removed a poorly configured Linux computer off the network.	

### CERES SCF/DAAC Server Information

<b>Server Name:</b>	<b>Asdsun</b>	<b>Darrin</b>	<b>Blizzard</b>	<b>Lightning</b>	<b>Samantha</b>	<b>thunder</b>
