

## CERES SCF STATUS

<i>Description</i>	<i>August 30, 2000 Status</i>	<i>Problems</i>
<b>Thunder &amp; Lightning</b>	GigE Testing is near completion. After reviewing the initial results, we are working on changing tuning parameters to increase performance.	
<b>Ntrigue/Citrix Metaframe servers</b>	Logrus has been repaired. All other terminal servers are in operation.	
<b>Security</b>	We continue to receive several scans for both the on-site and off-site networks on an approximately weekly basis. Each time we notify network support of the incidents.	
<b>Remedy Problem Tracking System</b>	We have loaded, configured and tested the second beta version of ARWeb that Remedy claims will fix the problems we were getting with the previous versions. This version also exhibits the same problem. Mr. Mackey is to contact NASA contracts about the problems with vendor performance.	
<b>Tape Library</b>	The tape library is now complete to the point that we can move the furniture and equipment back to where it should be. The contractor working on the room can work around our equipment to finish the job.	
<b>AMLJ</b>	Testing is to get underway this week using front-end scripts designed to eliminate NFS delays.	
<b>On site network problems</b>	Network has been normal except for typical sporadic outages. As outages occur we contact and work with Network Support.	

### CERES SCF/DAAC Server Information

<b>Server Name:</b>	<b>Asdsun</b>	<b>Blizzard</b>	<b>thunder</b>	<b>Lightning</b>	<b>Darrin</b>	<b>Samantha</b>
<i>Operating System:</i>	Solaris 2.6	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m (6/22/2000)
