CERES SCF STATUS

Description	August 15, 2000 Status	Problems
Thunder & Lightning	The PGS Toolkit is at the latest revisions and is operational. We are currently testing the new GigE hardware that has been installed.	
Ntrigue/Citrix Metaframe servers	Logrus' power supply died maintenance has been contacted. Logrus will be down until it is repaired.	
Security	We continue to receive scans for both the on-site and off-site networks on an approximately weekly basis. Each time we notify network support of the incidents.	
Remedy Problem Tracking System	Remedy suggested to use Remedy Web to fix the problems we are having. This package would not work and Remedy was able to reproduce the problems. Remedy has just shipped us 2nd Beta version of ARWeb (a new Beta version of the original package we tried) which we just installed and in the process of configuring and testing.	
Tape Library	Construction in the tape library is continuing and moving very slowly.	
On site network problems	We met with network support to discuss the cabling infrastructure, they can begin work on Nov. 15, 2000. They need JOs to buy all of the hardware this fiscal year. In the interim, the network is moderately stable, a new network router is still on order and should improve stability once the unit is installed.	

CERES SCF/DAAC Server Information

Server Name:	Asdsun	Blizzard	thunder	Lightning	Darrin	Samantha
Operating System:	Solaris 2.6	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m	IRIX64 6.5.7m (6/22/2000)
