

## CERES SCF STATUS

<i>Description</i>	<i>June 05, 2002 Status</i>	<i>Problems</i>
<b>1250 Network Upgrade</b>	<p><i>Asdsun</i> is tentatively scheduled to be moved to the new network next week pending receipt of a new license file for the T&amp;A software. C. Thomas was notified and is obtaining the new license. As previously indicated, the T&amp;A software will require a new license since <i>asdsun</i> will have a new IP and the T&amp;A software is tied to the IP.</p> <p>Prior info: This upgrade will not include any of the buildings included in the first phase of the rehab. The rehab will incorporate the second phase of the CAT 5 upgrade.</p>	
<b>SUN Upgrades</b>	<p>The onsite client systems are being upgraded as schedules allow.</p> <p>Prior info: It has been decided that the SCF will maintain one system at both the on and offsite facilities at Solaris 2.6 for formatting optical disk drives. This will be necessary since Sun nor the optical disk vendor (Sony) can provide software for formatting opticals under the Solaris 8 operating system. The end users will be able to read and write data from an optical attached to a Solaris 8 workstation; however, the Systems Administrators will handle initial formatting of the drives.</p>	
<b>SGI Upgrades</b>	<p>The SCF is about to start the SGI upgrades to IRIX 6.5.15m to standardize with the OS being loaded at the ASDC. The current plan is to upgrade the Calipso workstations first. We are experiencing a slip in the schedule to upgrade <i>blizzard</i> and possibly <i>thunder</i> and <i>lightning</i>. We did not anticipate it would require a week to download the new OS, compilers and required subsystem software from the SGI site.</p>	
<b>Security</b>	<p>We are coming into the time of year when we get the most system attacks. This period usually extends from June 15 through August 31. I would like to remind everyone to be security conscious.</p> <p>As usual, the Systems Administrators both on and offsite continue to monitor all connections. Any attempted connections are immediately reported to Network Security.</p>	
<b>SAMII Data Transfer</b>	<p>No change since last report. Still waiting for the list of SAM II images that the group would like recopied.</p>	

<i>Description</i>	<i>June 05, 2002 Status</i>	<i>Problems</i>
<b>Toolkit</b>	<p>No updates are available for this two week time period.</p> <p>Prior info: At this time the brand “sgi” is being investigated to see if it is supported with the latest version of the toolkit.</p> <p>The latest version 5.2.7.4v1 of the toolkit “BRAND sgi64” has been compiled on lightning. This toolkit has not been tested yet. Once the brand sgi64 has been tested and found operational, we will compile brands sgi and sgi32. This toolkit is entirely different from the previous toolkit. It now includes HDF version 4.1r3 and 5-1.4.1 as well as HDFeos versions 2.7.2v1 and 5.1. We expect this toolkit to be tested the first of the year and the additional brands compiled at that time.</p>	
<b>Bldg. 1250 Personnel Relocation</b>	All of the scheduled moves have been completed. We are currently involved with helping to setup the summer students.	
<b>AC Replacement</b>	This coming weekend we plan to take down the Sun and SGI servers in the computer room to have the A/C unit replaced. This shutdown is currently expected to take place Friday June 7 at 4 p.m. We expect the servers to be back up and operational by Monday, June 10.	

### CERES SCF/DAAC Server Information

<b>Server Name:</b>	<b>Asdsun</b>	<b>Blizzard</b>	<b>Thunder</b>	<b>Lightning</b>	<b>Darrin</b>	<b>Samantha</b>	<b>Warlock</b>
<i><b>Operating System:</b></i>	Solaris 2.6	IRIX64 6.5.11m	IRIX64 6.5.11m	IRIX64 6.5.11m	IRIX64 6.5.11m	IRIX64 6.5.11m	IRIX64 6.5.15m
