FM5 Status
There are a handful of SCCRs for FM5. These are mostly correcting errors found during NCT4.

CERESlib (SCCR 859) and Perl_Lib (SCCR 846) need to be delivered, but not promoted for next week's stress test.

The September 6 NPP freeze date doesn't apply to us since we're "science", not an "element".

Launch is still scheduled for October 25.

We're in the second day of the Operational Readiness Review. The Mission Readiness Review is scheduled for September 6.

There will be a re-do of the TVAC 36-hour data flow next Tuesday and Wednesday.

SCCR Discussion (SCCRs that have been submitted or updated since the last meeting)
Instrument 863 – Correcting pre-ES-8 header problem discovered during NCT4.
