CERES Software Configuration Change Request Submittal

=====

Subsystem: Perl_Lib

SCCR Date: 04/04/2011

SCCR Number: 844

Parameter Change: () YES (X) NO

Description of Change (Science):

N/A

Reason for Change (Science):

N/A

Description of Change (non-Science):

Adding Log::Summary class to Perl_Lib to provide routines for writing and reading submission log files.

Adding 'test_suites/Test_Submission_Summary.pl' to test routines in Log::Summary.

Reason for Change (non-Science):

Developers and operators need a summary log file to capture the status of instances submitted to Sun Grid Engine through the AMI Job Submission Scripts. The summary file will report the command used to launch the SGE_Driver, the directory which the SGE_Driver was called, the timestamp to which the log was created, and a list of the status of the instances which were attempted to submit. The statuses are successfully submitted, failed due to Sun Grid Engine failure, failed due to missing inputs, and failed due to existing outputs. The information in the summary can be further used to examine and report the progress of Sun Grid Engine instances launched with the SGE_Driver.

=====

Parameter Change: () YES (X) NO

Description of Change (Science):
N/A

Reason for Change (Science):
N/A

Description of Change (non-Science):
CheckForExecutables has been updated to accept the requested platform to check and to return a list of missing binary executables.

Reason for Change (non-Science):
CheckForExecutables should return a list of the missing executables instead of true/false that an executable is missing.
This can be used for multi-platform PGEs such that binaries missing for other architectures are not preventing jobs from running on architectures which the binaries do exist.
